CUBBYCUBES

HOW TO USE LIST

How do I set this up for my camper?

- Pack each unit with similar items in the CubbyCubes, place sticker on front window & write what's inside. Now they can easily find the items when needed.

What if they don't keep them neat?

The contents don't have to be 'neat', just accessible. Don't be concerned if the clothes going back into the CubbyCubes are messy. Even after laundry is returned, it is more important that it is easier for your camper to find what they are looking for.

Do they unpack the clothes from the CubbyCubes once they get to camp?

No need to remove the clothes, things stay more organized with the clothes in the units. They can easily be stacked, that way it creates more room on the shelves or in the cubbies for different items.

How do I use the STICKER?

Place the sticker on the clear window on the front of the CubbyCube. Use a permanent marker to write what contents are inside. To erase: use a cotton pad with rubbing alcohol to clean the label. We recommend using a 'Lovable Labels' style sticker typically used for clothing on that window. It is very likely other campers will have these in the cabin & this way they can easily find theirs.
